Enter Provisioning URL via the Yealink DECT web interface

W52P   W56P   W60P

Supported Yealink DECT models: W52P, W56P, W60P

For a complete step by step guide to provision the Yealink DECT phones for use with 3CX see the general configuration guides of 3CX at https://www.3cx.com/support.

Yealink WP series

- Yealink W52P
- Yealink W56P
- Yealink W60P

Configuring the provisioning server via the Yealink web interface:

Step 1: Configure the base in 3CX

1. Obtain the phone's MAC address.
2. In 3CX Management Console navigate to ⇒ **"FXS/DECT"**.
3. Press **"+ Add FXS/DECT"**.
4. Select the Brand of the phone (Yealink).
5. From the dropdown list select the model.
6. Enter the device's MAC address and press **"OK"**.

7. Optional settings include the phone's **"Display Language"**, **"Time Zone"** and, if applicable, the network card interface in case the server has more than one IP address to which the phone shall be configured.
